

Installing the module

- 1 In the back office, open `Modules > Module Manager`.
- 2 Click **Upload a module**, at the top right of the screen.
- 3 Drag the **.zip** file you downloaded after your purchase into the drop area, without unzipping it.
- 4 Wait for the installation to finish, then click **Configure**.

You can reach the screen again at any time from `Modules > FS Tarteaucitron`, or from the **Configure** button in the module manager.

After installation

The consent banner shows from installation. Choose CDN or local cache mode, then enable the third-party services the shop uses.

Full documentation

The merchant guide and the technical documentation are published online:

<https://shop.freshapp.io/en/content/11-tarteaucitron>

Updating: just drop the new archive through the same path. PrestaShop detects the version and runs the upgrade; your settings are kept.

Compatibility

PrestaShop	PrestaShop 1.7.8 → 9.x
PHP	PHP 7.4 → 8.4
Bundled languages	Français, English
Module version	1.5.6

Support

A question about installing or using the module? Use the *Support* tab on the product page on PrestaShop Addons: requests are tracked there and you get the answer by e-mail.
